# KIOON PETS

BUILDING A PET SALES WEBSITE FOR KIMOON PETS USING NODEJS AND REACTJS

Providing a safe and reliable pet buying and selling service platform for both sellers and buyers. This includes verifying user information, providing secure payment options, and protecting personal information, aiming for a user-friendly e-commerce platform while managing purchase details.
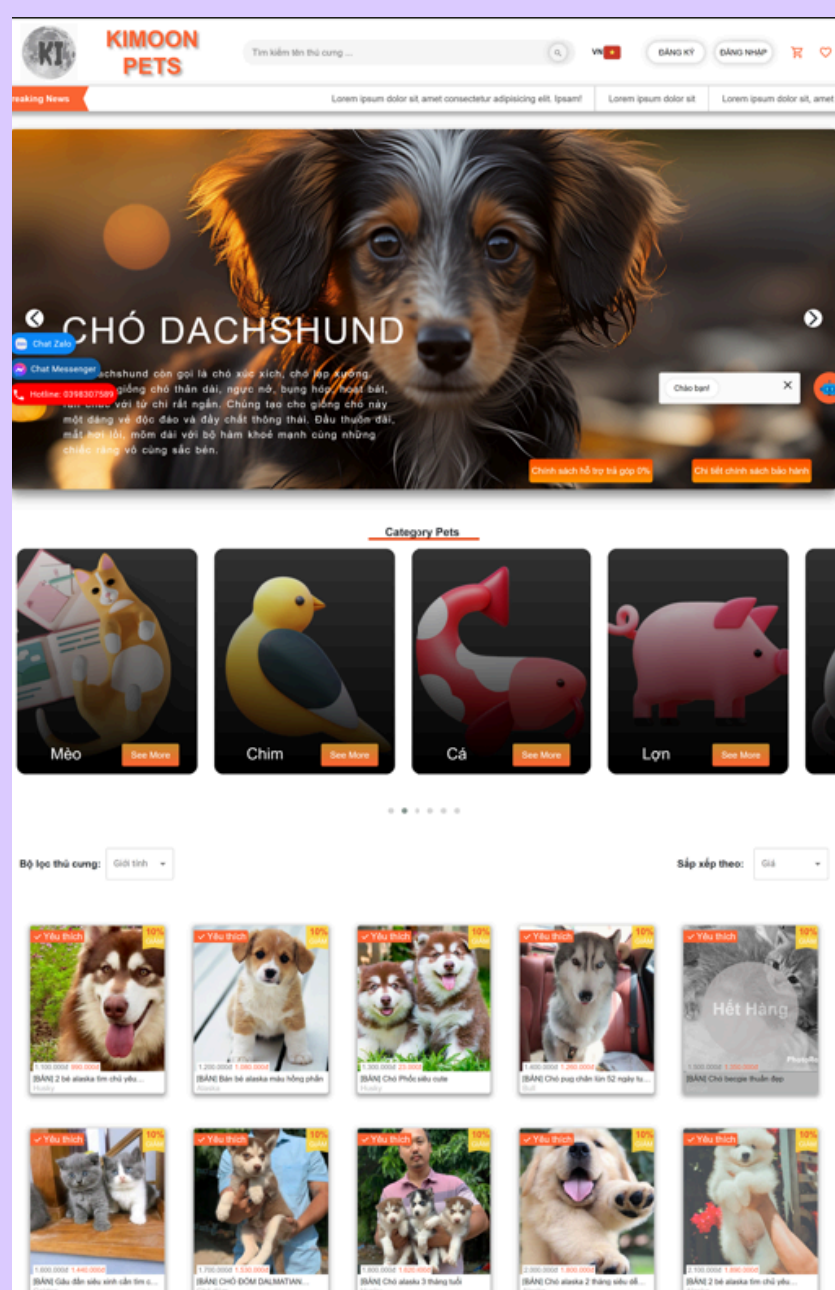

Main function

Order, online payment, chatbox Al, pets management, order management, revenue statistics, send mail, ...
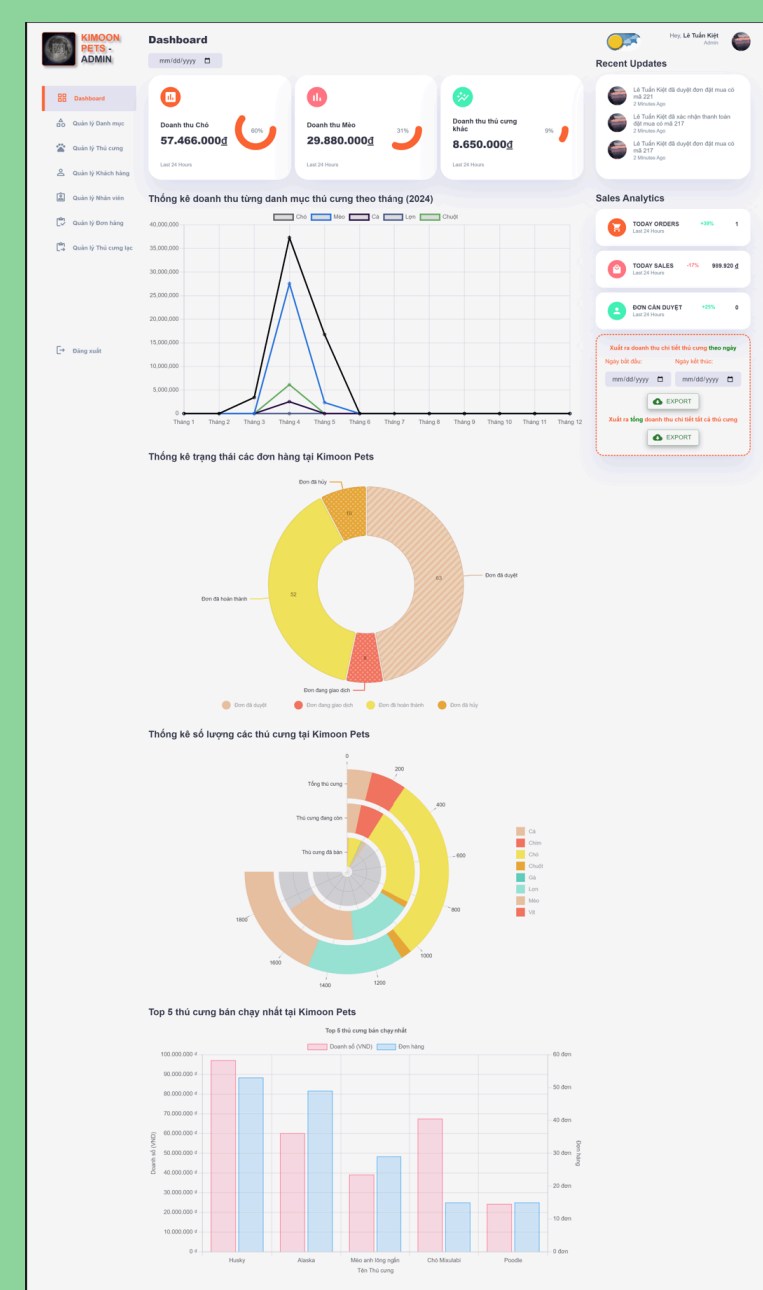

Using technologies such as nodejs, reactjs, firebase, styled-components, chatbox AI DialogFlow,...

Complete the proposed functions of the book selling website to meet customer needs, while strictly managing the website's revenue.

Result

Customer page view - this is where users experience the website.

Admin page view - this is where administrators experience the website.

KIMOON PETS-"Experience me and I will show you what satisfaction is 💖"
